

Planning Ref No: _____

Submitting a planning application and the use of artificial intelligence (AI)

North Norfolk District Council recognises that AI can be used to support planning application work, and that this can be done positively when it is used effectively and transparently.

The manner in which evidence is produced is not likely to be material to an application if a competent planning professional (or other professional related to the topic of the supporting evidence) can fully stand behind the evidence provided.

Therefore, we require you to provide confirmation of this as part of the validation process.

Further information regarding this requirement is available as part of the Planning Authority's [validation requirements](#).

Please complete the declaration below and return to planning@north-norfolk.gov.uk as soon as possible.

Declaration

I confirm that “generative” AI **HAS / HAS NOT*** been used as part of the above referenced application submitted.

I confirm that, where “generative” AI has been used, I fully stand behind the evidence submitted in support of the proposed development as being an accurate reflection of the proposal.

I confirm that, where “generative” AI has been used, its use in producing documents in support of this planning application is responsible and lawful.
