# Sheringham Leisure Centre

Work has officially begun on Sheringham Leisure Centre and we were joined by North Norfolk District Council and Everyone Active to celebrate the milestone at our ground-breaking ceremony.

We have completed our site set up and ground improvement works, which included installation of 762 stone columns to withstand the new leisure centre building loads. Work is ongoing with the centre's foundations and we have installed 80m of sheet piling in order to safely commence the bulk excavation of the pool areas (pictured right).

Throughout this project, we will be working closely with local councillors, neighbours and residents. At the beginning of November we welcomed local resident Hayden for work experience. Following his two weeks with us, we are delighted to have Hayden join our team on a more permanent basis as Trainee Site Engineer.

In the new year we will be working with local schools and colleges, giving students an insight into the building and construction environment and the exciting new facility in their area!
